GEN & R I SECT 2556 - 6 NOV 1941 L S G BRANCH

SECY L W DEPT 3 NOV 1941 GOVT OF MYSORE

Subject:-Government grant for filling up the moat near the Jubilee Hall, Kolar

Adverting to Government Order No L 3037-51-11 101-41-7 dated 20-10-1941 distributing the allotment under "Town Improvement Grants" among certain Municipalities in the State for the current year and keeping a sum of Rs 46,033/- in reserve, I have the honour to [redacted] that a grant of Rs 1195/- for the above work had been recommended to the Kolar Town Municipality in this office letter No A5 P R 59/41-42 dated 1-9-1941 but the same has not been sanctioned by Government The President, Town Municipal Council, Kolar states in his letter No H C 63/41-42 dated 24-10-1941 (copy enclosed) that the moat in question is situated immediately behind the Roman Catholic Church and by the side of an important thoroughfare in the town, viz , the Cuddapah Railway Feeder State Fund Road and that it is necessary to fill up this moat not only to form a bus Stand but also in the interests of health and decency of the locality He reports that the Municipality is too poor to bear the cost of the work and requests that a special recommendation may be made to Government to sanction a grant to enable the Municipality to take up this urgent work of town improvement

In the circumstances stated above, I request that Government may be pleased to sanction a grant of Rs 1195/- to the Kolar Town Municipality from the reserve held under "Town Improvement Grants" for the current year

I have the honour to be
Sir,
Your most obedient servant,

Senior Assistant Commissioner,
for Deputy Commissioner,
Kolar District

(absent from headquarters)

Letter No H C 63/41-42 dated, Kolar, the 24th October 1941 from the President, Town Municipal Council, Kolar, to the Deputy Commissioner, Kolar District

In connection with the formation ofa Bus Stand, a site has been selected to the south of the Protestant Church near the Sri Krishnarajendra ~~Silver~~ Jubilee Hall, Kolar A portion of this site is covered by a moat which renders the area ugly and the formation of the Bus Stand difficult, unless it is completely filled and levelled up I have the honour to state that an estimate for Rs 1195/- has been prepared for filling up this pit and the work has been taken up in view of its urgency by calling tenders It has been decided to shift the present Bus Stand on the suggestion of the Dewan to the place now selected The existence of this pit in front of the Jubilee Hall is eye-sore to the public and the stagnant water is a fertile source for breeding malaria In the interests of the health of the town, it is very necessary to close this pit and it would be a distinct item of Town Irprovement Work The authorities of the Church have a standing grievance against the Municipality for not getting this pit closed for nearly 25 years

The Council is not in a position to meet the cost of this work in view of its poor financial ~~xxx~~ condition. A reference has been made in this office letter No H C 131/40-41 dated 7-3-1941 for the sanction of Rs 1195/- as an outright grant from Government for this purpose

The Bus Stand is now situated in a private site and a good deal of inconvenience is being felt by the public as the site itself is very small and no special facilities are provided for passengers by way of a Waiting Shed, Latrines etc For an important district headquarter town like Kolar, an up-to-date Bus Stand is an urgent necessity The Municipality have agreed to contribute their quota for the construction of a Bus Shelter and action is being taken separately on this behalf Hence the grant for this purpose may kindly be recommended

I therefore request you to kindly move the Government to sanction a sum of Rs 1200/- for this important work out of the Reserve held under Town Improvement Grants for 1941-42

Subject - Laying underground stone-ware pipe line in place of the open drain constructed behind the Sri Narasimharaja Hospital Buildings at Kolar as per instructions of the Dewan on 22nd March 1941

Sir

I have the honour to forward herewith an estimate amounting to Rs 4 125/- for the above work received from the Superintending Engineer Mysore Circle The estimate is prepared in accordance with the instructions of the Dewan on 22nd March 1941 when he visited Kolar District in connection with the opening ceremony of the Dispensary at Kyalanur The estimate is countersigned by the President Town Municipal Council Kolar

2 The report accompanying the estimate explains the necessity for the work and the provisions made therein

3 The open drain in the hospital ground running just behind the newly constructed Lady Medical Officer's quarters conveys sewage of Kolar Town It is a source of nuisance causing ill-health in the Hospital premises The underground drainage is quite necessary to improve the sanitary condition of the Hospital area

4 Regarding the source of meeting the cost, it may be stated that it is a legitimate charge to be borne by the Kolar Town Municipal Council It is also reported that the financial position of the Municipality is very poor, and that they cannot therefore take up the work for many years to come and that it is even probable that the Council will be able to share the expenditure It is therefore considered necessary that a special grant of Rs 4 125/- may be made available under "30 Grants - Public Improvements" in view of its importance and immediate necessity

5 Under these circumstances it seems to me that the estimate may be sanctioned under "30 Grants - Public Improvements" I request you to kindly obtain the orders of Government both as regards the estimate and the additional grant

I have the honour to be,

S i r

Your most obedient servant,

CHIEF ENGINEER OF MYSORE

Report to accompany the Estimate for Underground Drainage System for the Hospital Area, Kolar Town

Amount of Estimate Rs 4,125/-

The estimate has been got up in accrodance with the instructions of the Dewan issued during his inspection of Kolar Town on March 22, 1941

The drainage of a portion of the Kolar Town is led on to the Kolar Amanikere Tank in an open drain running by the side of the Electric Transformer Station, Kolar and between the two - Hospitals This open drain is in some places in a dilapidated condition and causes obstruction to the flow of sewage After the drain crossed the Kolar - Bowringpet Road, it flows in a - natural halla and as the tank bed is reached shortly the sewage stagnates and is a source of nuisance to both the Hospitals It is now proposed to lead this sewage in an underground sewer - starting from just behing the Transformer Station and running - right into the Tank bed.

All the necessary items of work required for laying a 9" S W sewer have been included in the estimate The two - open drains - one behind the Transformer Station and one along the Bowringpet Road will be connected on to the underground - system Leap weir arrangements have been provided to take care of storm water The sewage of the Electric Colony also is - now connected to the open drain It will be essential to take this also into the underground line Provision has therefore - been made for a 6" S W pipe line 250 ftl long with a cistern - for this item

The required specials have also been included The number of manholes is nine of varying depths suitably located

The cost is to be borne by the Town Municipal Council,

P T O

Kolar Tools and Plant charges at 12½% have been included in the estimate as usual.
